

Potential Solutions to Reduce Gasoline Prices

Supply-Side

- Grant CA & NY oxygen content waivers
- Reduce the number of boutique fuels
- Streamline infrastructure permitting processes
- Increase gasoline imports
- Increase storage capacity
- Increase domestic oil drilling (possibly in the Arctic National Wildlife Refuge)
- Drawdown or cease filling the Strategic Petroleum Reserve

Demand-Side

- Properly inflate tires
- Improve vehicle maintenance
- Remove items from car trunks
- Improve corporate average fuel economy standard
- Provide incentives for public transportation & carpooling
- Encourage hybrid use
- Develop alternative fuels (e.g., hydrogen & biodiesel)
